

How To Install Monitor Bracket to Cabinet

1. Remove top half of the cabinet so that you can access the bottom front of it.
2. Place the top half the cabinet on a flat surface to be able to work comfortably.
3. Locate 3 rivets and 6 washers, each rivet will need 2 washers.
4. Line up the bracket to the cabinet, using the 3 holes from each.
5. Insert the rivet from the bottom with a washer underneath and another on top. *(see diagram below for visual aid)*
6. Use the rivet gun to press the rivet.
7. Install the other 2 rivets the same way to finish installing the bracket onto the cabinet.
